First aid is one of the activities run by the youth club. The first aid page will include content covered at the activity, as follows:

- a link to a website which contains a video of how to make an arm sling
- a main heading 'How to make an Arm Sling'
- a numbered list detailing the steps required to put someone's arm into a sling
- a graphic called 'armsling.jpg'
- a paragraph of text introducing the numbered list

3b   In the space below, draw a wireframe design showing how you would position the above content on the page.

19 <p>When someone hurts their arm or shoulder badly, it is important to hold the injury still using a sling. Instructions detailing how to put a sling on a patient
20 <ol>
21 <li>Before applying a sling, check for cuts and make sure any bleeding has stopped.</li>
22 <li>For forearm slings, use padding for the injured arm and tie the sling around the patient's neck on the uninjured side.</li>
23 <li>For shoulder or collarbone slings, drape the long side of the bandage down from the shoulder on the uninjured side, bring it over your patient's arm and tie
24 <li>Make sure the sling keeps your patient's arm in place but is not so tight that it limits blood flow.</li>
25 <li>If there is severe bleeding or if you suspect a dislocated joint or broken bone, see a doctor immediately.</li>
26 </ol>
